Part B Drug Inflation Rebates

From time to time, Annual Sales Price (ASP) public files need to be corrected or updated, generally referred to as a restatement, based on feedback received after the files are published. If CMS receives feedback that necessitates updates to this list of drugs with adjusted coinsurance amounts, CMS will update the list. The October 1 – December 31, 2026 files may be subject to updates either before the start of the quarter or after in the event updated data becomes available. For more information on the adjusted co-insurance percentages, you may refer to the Quarterly Updates to Part B Coinsurance Adjustment section here.

How to use this list:

We are providing a list of impacted Part B drugs as well as the adjusted coinsurance percentage. **The standard coinsurance for Part B drugs for Medicare members is 20%.** The coinsurance percentage shown in this list has been adjusted for inflation and will be applied to your share of the Rx cost after you meet your deductible. If you have questions about the lower cost or feel this has not been applied, please call the number on the back of your CarePlus ID card. Please note, these changes do not apply to Medicare Part D Prescription Drug Coverage.

This list is in alphabetical order and searchable. Click CTRL+F to type in your drug name to search.
