# Prescription Drug Guide

## Humana Formulary

List of covered drugs or "Drug List"

PLEASE READ: THIS DOCUMENT CONTAINS INFORMATION  
ABOUT THE DRUGS WE COVER IN THIS PLAN.

Humana Value Rx Plan (PDP)

Formulary 25450

This formulary was updated on 01/01/2025. For more recent information or other questions, please contact the Humana Customer Care Team with any questions at 1-800-281-6918 or for TTY users, 711, five days a week April 1 – September 30 or seven days a week October 1 – March 31 from 8 a.m. - 8 p.m. Our automated phone system is available after hours, weekends, and holidays. Our website is also available 24 hours a day 7 days a week, by visiting **Humana.com**.

For a complete list of Contract/PBP numbers this document relates to, please see the final page of this document.

# Humana®

# Welcome to Humana!

**Note to existing members:** This Formulary has changed since last year. Please review this document to make sure that it still contains the drugs you take. When this Drug List (Formulary) refers to “we,” “us”, or “our,” it means Humana. When it refers to “plan” or “our plan,” it means Humana.

This document includes a Drug List (formulary) for our plan which is current as of January 2025. For an updated Drug List (formulary), please contact us. Our contact information, along with the date we last updated the Drug List (formulary), appears on the front and back cover pages.

You must generally use network pharmacies to use your prescription drug benefit. Benefits, formulary, pharmacy network, and/or copayments/coinsurance may change on January 1 of each year, and from time to time during the year.

## What is the Humana formulary?

In this document, we use the terms Drug List and formulary to mean the same thing. A formulary is a list of covered drugs selected by Humana in consultation with a team of health care providers, which represents the prescription therapies believed to be a necessary part of a quality treatment program. Humana will generally cover the drugs listed in the formulary as long as the drug is medically necessary, the prescription is filled at a Humana network pharmacy, and other plan rules are followed. For more information on how to fill your medicines, please review your Evidence of Coverage.

## Can the formulary change?

Most changes in drug coverage happen on January 1, but we may add or remove drugs on the formulary during the year, move them to different cost-sharing tiers, or add new restrictions. We must follow Medicare rules in making these changes. Updates to the formulary are posted monthly to our website here:

**[Humana.com/medicaredruglist](https://www.humana.com/medicaredruglist).**

**Changes that can affect you this year:** In the below cases, you will be affected by coverage changes during the year:

- **Immediate substitutions of certain new versions of brand name drugs and original biological products.** We may immediately remove a drug from our formulary if we are replacing it with a certain new version of that drug that will appear on the same or lower cost-sharing tier and with the same or fewer restrictions. When we add a new version of a drug to our formulary, we may decide to keep the brand name drug or original biological product on our formulary, but immediately move it to a different cost-sharing tier or add new restrictions.

We can make these immediate changes only if we are adding a new generic version of a brand name drug, or adding certain new biosimilar versions of an original biological product, that was already on the formulary (for example, adding an interchangeable biosimilar that can be substituted for an original biological product by a pharmacy without a new prescription).

If you are currently taking the brand name drug or original biological product, we may not tell you in advance before we make an immediate change, but we will later provide you with information about the specific change(s) we have made.

If we make such a change, you or your prescriber can ask us to make an exception and continue to cover for you the drug that is being changed. For more information, see the section below titled “How do I request an exception to the Humana Formulary?”

Some of these drug types may be new to you. For more information, see the section below titled “What are original biological products and how are they related to biosimilars?”

- **Drugs removed from the market.** If a drug is withdrawn from sale by the manufacturer or the Food and Drug Administration (FDA) determines to be withdrawn for safety or effectiveness reasons, we may immediately remove the drug from our formulary and later provide notice to members who take the drug.
- **Other changes.** We may make other changes that affect members currently taking a drug. For instance, we may remove a brand name drug from the formulary when adding a generic equivalent or remove an original biological product when adding a biosimilar. We may also apply new restrictions to the brand name drug or original biological product, or move it to a different cost-sharing tier, or both. We may make changes based on new clinical guidelines. If we remove drugs from our formulary, or add prior authorization, quantity limits and/or step therapy restrictions on a drug or move a drug to a higher cost-sharing tier, we must notify affected members of the change at least 30 days before the change becomes effective. Alternatively, when a member requests a refill of the drug, they may receive a 30-day supply of the drug and notice of the change.

We will notify members who are affected by the following changes to the formulary:

- When a drug is removed from the formulary.
- When prior authorization, quantity limits, or step-therapy restrictions are added to a drug or made more restrictive.
- When a drug is moved to a higher cost sharing tier.

If we make these other changes, you or your prescriber can ask us to make an exception for you and continue to cover the drug you have been taking. The notice we provide you will also include information on how to request an exception, and you can also find information in the section below titled “How do I request an exception to the Humana Formulary?”

**Changes that will not affect you if you are currently taking the drug.** Generally, if you are taking a drug on our 2025 formulary that was covered at the beginning of the year, we will not discontinue or reduce coverage of the drug during the 2025 coverage year except as described above. This means these drugs will remain available at the same cost-sharing and with no new restrictions for those members taking them for the remainder of the coverage year. You will not get direct notice this year about changes that do not affect you. However, on January 1 of the next year, such changes would affect you, and it is important to check the formulary for the new benefit year for any changes to drugs.

The enclosed formulary is current as of January 2025. To get updated information about the drugs covered by Humana please contact us. Our contact information appears on the front and back cover pages.

#### **What if you are affected by a Drug List change?**

We will notify you by mail at least 30 days before one of these changes happens or we will provide a 30-day refill of the affected medicine with notice of the change.

## How do I use the formulary?

There are two ways to find your drug in the formulary:

### Medical condition

The formulary begins on page 11. The drugs in this formulary are grouped into categories depending on the type of medical conditions that they are used to treat. For example, drugs that treat a heart condition are listed under the category “Cardiovascular Agents.” If you know what medical condition your drug is used for, look for the category name in the list that begins on page 11. Then look under the category name for your drug. The formulary also lists the Tier and Utilization Management Requirements for each drug (see page 6 for more information on Utilization Management Requirements).

### Alphabetical listing

If you are not sure what category to look under, you should look for your drug in the Index that begins on page 85. The Index provides an alphabetical list of all of the drugs included in this document. Both brand name drugs and generic drugs are listed in the Index. Look in the Index and find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to the page listed in the Index and find the name of the drug in the first column of the list.

Prescription drugs are grouped into one of five tiers.

Humana covers both brand-name drugs and generic drugs. A generic drug is approved by the FDA as having the same active ingredient as the brand-name drug. Generally, generic drugs cost less than brand-name drugs.

- **Tier 1 - Preferred Generic:** Generic or brand drugs that are available at the lowest cost share for the plan
- **Tier 2 - Generic:** Generic or brand drugs that the plan offers at a higher cost to you than Tier 1 Preferred Generic drugs
- **Tier 3 - Preferred Brand:** Generic or brand drugs that the plan offers at a lower cost to you than Tier 4 Non-Preferred drugs
- **Tier 4 - Non-Preferred Drug:** Generic or brand drugs that the plan offers at a higher cost to you than Tier 3 Preferred Brand drugs
- **Tier 5 - Specialty Tier:** Some injectables and other high-cost drugs

### **What are generic drugs?**

Humana covers both brand name drugs and generic drugs. A generic drug is approved by the FDA as having the same active ingredient as the brand name drug. Generally, generic drugs work just as well as and usually cost less than brand name drugs. There are generic drug substitutes available for many brand name drugs. Generic drugs usually can be substituted for the brand name drug at the pharmacy without needing a new prescription, depending on state laws.

### **What are original biological products and how are they related to biosimilars?**

On the formulary, when we refer to drugs, this could mean a drug or a biological product. Biological products are drugs that are more complex than typical drugs. Since biological products are more complex than typical drugs, instead of having a generic form, they have alternatives that are called biosimilars. Generally, biosimilars work just as well as the original biological product and may cost less. There are biosimilar alternatives for some original biological products. Some biosimilars are interchangeable biosimilars and, depending on state laws, may be substituted for the original biological product at the pharmacy without needing a new prescription, just like generic drugs can be substituted for brand name drugs.

- For discussion of drug types, please see the Evidence of Coverage, Chapter 5, Section 3.1, “The ‘Drug List’ tells which Part D drugs are covered” if you have a Medicare Advantage plan. If you have a Prescription Drug Plan (PDP), please see the Evidence of Coverage, Chapter 3, Section 3.1, “The ‘Drug List’ tells which Part D drugs are covered”. The type of plan can be found at the top of your Evidence of Coverage.

### **How much will I pay for covered drugs?**

Humana pays part of the costs for your covered drugs and you pay part of the costs, too.

### **The amount of money you pay depends on:**

- Which tier your drug is on
- Whether you fill your prescription at a network pharmacy
- Your current drug payment stage - please read your Evidence of Coverage (EOC) for more information

**If you qualified for extra help with your drug costs, your costs may be different from those described above. Please refer to your Evidence of Coverage (EOC) or call Customer Care to find out what your costs are.**

### **Are there any restrictions on my coverage?**

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Prior Authorization (PA):** Humana requires you to get prior authorization for certain drugs. This means that you will need to get approval from Humana before you fill your prescriptions. If you do not get approval, Humana may not cover the drug.
- **Quantity Limits (QL):** For certain drugs, Humana limits the amount of the drug that is covered. Humana might limit how many refills you can get or how much of a drug you can get each time you fill your prescription. For example, if it is normally considered safe to take only one pill per day for a certain drug, we may limit coverage for your prescription to no more than one pill per day. Some drugs are limited to a 30-day supply regardless of tier placement.
- **Step Therapy (ST):** In some cases, Humana requires that you first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, Humana may not cover Drug B unless you try Drug A first. If Drug A does not work for you, Humana will then cover Drug B.
- **Part B versus Part D (BvsD):** Some drugs may be covered under Medicare Part B or Part D depending upon the circumstances. Information may need to be submitted to Humana that describes the use and the place where you receive and take the drug so a determination can be made.

For drugs that need prior authorization or step therapy, or drugs that fall outside of quantity limits, your health care provider can fax information about your condition and need for those drugs to Humana at **1-877-486-2621**. Representatives are available Monday - Friday, 8 a.m. - 8 p.m. (EST).

You can find out if your drug has any additional requirements or limits by looking in the formulary that begins on page 11.

You can also get more information about the restrictions applied to specific covered drugs by visiting **[Humana.com/medicaredruglist](https://www.humana.com/medicaredruglist)**. We have posted online documents that explain our prior authorization and step therapy restrictions. You may also ask us to send you a copy. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

You can ask Humana to make an exception to these restrictions, limits or for a list of other, similar drugs that may treat your health condition. See the section "**How do I request an exception to the Humana formulary?**" on page 7 for information about how to request an exception.

## What if my drug is not on the Formulary?

If your drug is not included in this formulary (list of covered drugs), you should first contact Humana Customer Care and ask if your drug is covered. For more information, please contact us. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

If you learn that Humana does not cover your drug, you have two options:

- You can ask Customer Care for a list of similar drugs that are covered by Humana. When you receive the list, show the list to your doctor and ask them to prescribe a similar drug that is covered by Humana.
- You can ask Humana to make an exception and cover your drug. See below for information about how to request an exception.

## What is a compounded drug?

A compounded drug is used to provide drug therapies that are not commercially available as FDA-approved finished products in the same dose, formulation, and/or combination of ingredients, but are instead created by a pharmacist by combining or mixing ingredients to create a prescription medication customized to the needs of an individual patient. While some compounded drugs may be Part D eligible, most compounded drugs are non-formulary drugs (not covered) by your plan. You may need to ask for and receive an approved coverage determination from us to have your compounded drug covered.

## How do I request an exception to the Humana Formulary?

You can ask Humana to make an exception to the coverage rules. There are several types of exceptions that you can ask us to make.

- **Formulary exception:** You can ask us to cover a drug even if it is not on our formulary. If approved, this drug will be covered at a pre-determined cost-sharing level, and you would not be able to ask us to provide the drug at a lower cost-sharing level.
- **Utilization restriction exception:** You can ask us to waive a coverage restriction including prior authorization, step therapy, or a quantity limit on your drug. For example, for certain drugs, Humana Group Medicare Plan limits the amount of the drug that we will cover. If your drug has a quantity limit, you can ask us to waive the limit and cover a greater amount.
- **Tier exception:** You can ask us to cover a formulary drug at lower cost-sharing level unless the drug is on the specialty tier. If approved, this would lower the amount you must pay for your drug.

Generally, Humana will only approve your request for an exception if the alternative drugs included on the plan's formulary, the lower cost sharing drug, or applying the restriction would not be as effective for you and/or would cause you to have adverse effects.

You or your prescriber should contact us to ask for an initial coverage decision for a formulary, tier, or utilization restriction exception.

**When you ask for an exception, you should submit a statement from your health care provider that supports your request. This is called a supporting statement.**

Generally, we must make our decision within 72 hours of getting your prescriber's supporting statement. You can ask for an expedited (fast) decision if you believe, and we agree, that your health could be seriously harmed by waiting up to 72 hours for a decision. If we agree, or if your prescriber asks for a fast decision, we must give you a decision no later than 24 hours after we get your prescriber's supporting statement.

## What can I do if my drug is not on the formulary or has a restriction?

As a new or continuing member in our plan you may be taking drugs that are not on our formulary. Or, you may be taking a drug that is on our formulary but has a coverage restriction, such as prior authorization. You should talk to your prescriber about requesting a coverage decision to show that you meet the criteria for approval, switching to an alternative drug that we cover, or requesting a formulary exception so that we will cover the drug you take.

While you and your doctor determine the right course of action for you, we may cover your drug in certain cases during the first 90 days you are a member of our plan.

For each of your drugs that is not on our formulary or has a coverage restriction, we will cover a temporary 30-day supply. If your prescription is written for fewer days, we'll allow refills to provide up to a maximum 30 day supply of medication. If coverage is not approved, after your first 30-day supply, we will not pay for these drugs, even if you have been a member of the plan less than 90 days.

If you are a resident of a long-term care facility and you need a Part D drug that is not on our formulary or if your ability to get your drug is limited, but you are past the first 90 days of membership in our plan, we will cover a 31-day emergency supply of that drug unless you have a prescription written for fewer days. (in which case we will allow multiple fills to provide up to a total of 31 days of a drug) while you pursue a formulary exception.

Throughout the plan year, your treatment setting (the place where you receive and take your medicine) may change. These changes include:

- Members who are discharged from a hospital or skilled-nursing facility to a home setting
- Members who are admitted to a hospital or skilled-nursing facility from a home setting
- Members who transfer from one skilled-nursing facility to another and use a different pharmacy
- Members who end their skilled-nursing facility Medicare Part A stay (where payments include all pharmacy charges) and who now need to use their Part D plan benefit
- Members who give up Hospice Status and go back to standard Medicare Part A and B coverage
- Members discharged from chronic psychiatric hospitals with highly individualized drug regimens

For these changes in treatment settings, Humana will cover as much as a 31-day temporary supply of a Part D-covered drug when you fill your prescription at a pharmacy. If you change treatment settings multiple times within the same month, you may have to request an exception or prior authorization and receive approval for continued coverage of your drug. Humana will review requests for continuation of therapy on a case-by-case basis understanding when you are on a stabilized drug regimen that, if changed, is known to have risks.

### **Transition extension**

Humana will consider on a case-by-case basis an extension of the transition period if your exception request or appeal has not been processed by the end of your initial transition period. We will continue to provide necessary drugs to you if your transition period is extended.

A Transition Policy is available on Humana's Medicare website, **Humana.com**, in the same area where the Prescription Drug Guides are displayed.

### **CenterWell Pharmacy™**

You may fill your medicines at any network pharmacy. CenterWell Pharmacy – Humana's mail-delivery pharmacy is one option. CenterWell Pharmacy is the preferred cost-sharing mail order pharmacy for many Humana MAPD and prescription drug plans (PDP). You can have your maintenance medicines, specialty medicines, or supplies mailed to a place that is most convenient for you. You should get your new prescription by mail in 7 – 10 days after CenterWell Pharmacy has received your prescription and all the necessary information. Refills should arrive within 5 – 7 days. To get started or learn more, visit **CenterWellPharmacy.com**. You can also call CenterWell Pharmacy at **1-844-222-2151 (TTY: 711)** Monday – Friday, 8 a.m. to 11 p.m. (EST), and Saturday, 8 a.m. to 6:30 p.m. (EST).

Other pharmacies are available in our network.

## For More Information

For more detailed information about your Humana prescription drug coverage, please review your Evidence of Coverage and other plan materials.

If you have questions about the Humana plan, please contact us. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

If you have general questions about Medicare prescription drug coverage, please call Medicare at **1-800-MEDICARE (1-800-633-4227)** 24 hours a day, seven days a week. **TTY** users should call **1-877-486-2048**. You can also visit **[www.medicare.gov](http://www.medicare.gov)**.

# Humana Formulary

The formulary that begins on the next page provides coverage information about the drugs covered by Humana. If you have trouble finding your drug in the list, turn to the Index that begins on page 85.

## How to read your formulary

The first column of the chart lists categories of medical conditions in alphabetical order. The drug names are then listed in alphabetical order within each category. Brand-name drugs are CAPITALIZED and generic drugs are listed in lower-case italics. Next to the drug name or Utilization Management column, you may see an indicator to tell you about additional coverage information for that drug. You might see the following indicators:

**DL** - Dispensing Limit; Drugs that may be limited to a 30 day supply, regardless of tier placement.

**MO** - Drugs that are typically available through mail-order. Please contact your mail-order pharmacy to make sure your drug is available.

**LA** - Limited Access; The health plan has authorized certain pharmacies to dispense this medicine, as it requires extra handling, doctor coordination or patient education. Please call the number on the back of your ID card for additional information.

**AV** - Advisory Committee on Immunization Practices (ACIP) Covered Part D vaccines; Part D vaccines recommended by ACIP for adults that may be available at no cost to you; additional restrictions may apply. For more information, please refer to your Evidence of Coverage.

**CI** - Covered insulin products; Part D insulin products covered by your plan. For more information on cost sharing for your covered insulin products, please refer to your Evidence of Coverage.

**PDS** - Preferred Diabetic Supplies; BD and HTL-Droplet are the preferred diabetic syringe and pen needle brands for the plan.

The second column lists the tier of the drug. See page 5 for more details on the drug tiers in your plan.

The third column shows the Utilization Management Requirements for the drug. Humana may have special requirements for covering that drug. If the column is blank, then there are no utilization requirements for that drug. The supply for each drug is based on benefits and whether your health care provider prescribes a supply for 30, 60, or 90 days. The amount of any quantity limits will also be in this column (Example: "QL - 30 for 30 days" means you can only get 30 doses every 30 days). See page 6 for more information about these requirements.

DRUG NAME	TIER	UTILIZATION MANAGEMENT REQUIREMENTS
<b>ANALGESICS</b>		
acetaminophen-codeine 120 mg-12 mg /5 ml (5 ml), 120-12 mg/5 ml, 300 mg-30 mg /12.5 ml SOLUTION <b>DL</b>	3	QL(2700 per 30 days)
