

Where you get your vaccines may determine how they are covered

Your Group Medicare plan provides coverage for vaccines, but that coverage depends on the specific vaccine and where you get it. Knowing how your coverage works may save you from paying for vaccines out of pocket.

Medicare Part B vaccines

The Medicare Part B portion of your plan covers vaccines administered at your provider's office if the vaccine is directly related to the treatment of an injury or direct exposure to a disease or condition, such as hepatitis B, rabies, and tetanus.

The following Medicare Part B vaccines may be obtained at your provider's office or are readily available at a network pharmacy: influenza (flu), pneumococcal, and COVID-19 vaccine and boosters.

Medicare Part D vaccines

The Medicare Part D portion of your plan covers vaccines that are considered necessary to help prevent illness. Member cost share of all Part D vaccines listed on the Advisory Committee on Immunization Practices (ACIP) list¹ will be \$0.

Some common vaccines that you should get at your pharmacy, not from your provider's office, include shingles, Tdap and RSV.

Got questions?

Because vaccines are covered differently at the provider's office and the pharmacy, you may want to call first to understand how your insurance covers a specific vaccine. Call the Customer Care number on the back of your Humana member ID card or sign in to **MyHumana.com**.
