**LIBERTY Dental Plan of California, Inc.**  
**LS300 Plan Schedule of Benefits**  
**Covered Benefits, Member Co-payments, Limitations Exclusions**

**Limitations:**

---

1. Fabricated crowns, onlays and inlays may be covered when a tooth with a good prognosis requires restoration but has insufficient remaining structure to reliably retain a filling. Coverage for these procedures limited to members age 16 and over.
2. Procedures that appear to have a poor prognosis as determined by a licensed LIBERTY dentist consultant are not covered.
3. Localized delivery of antimicrobial agents may be covered 4-6 weeks after the completion of scaling and root planing as an adjunctive procedure for 2 non-responsive sites in a quadrant with 5mm pockets or deeper plus inflammation.
4. For treatment plans involving 7 or more units of crowns and/or fixed partial dentures (bridges), contracted providers may charge an additional \$200 co-payment per unit. In such cases, the first 6 units, as described in limitation #7 above, are covered at the specified member co-payment amount only, as documented in this Schedule of Benefits.
5. Fixed partial dentures (bridges) are covered when: replacing a "like-for-like" existing fixed partial denture with identical pontics and abutment teeth with good prognosis; abutment teeth qualify for crowns on their own merit; there is only one missing permanent tooth in a full arch and the bridge would have opposing teeth in the opposite arch.
6. Pediatric referrals, if authorized by LIBERTY, are covered only for dependent children through the age of 6 unless the child qualifies under the American with Disabilities Act (ADA).

**Exclusions:**

---

1. Any procedure not specifically listed as a Covered Benefit.
2. Replacement of lost or stolen prosthetics or appliances including partial dentures, full dentures, and orthodontic appliances.
3. General anesthesia, analgesia, intravenous/intramuscular sedation or the services of an anesthesiologist other than those situations described in the Schedule of Benefits (\*\*).
4. Treatment started prior to coverage or after termination of coverage.
5. Procedures, appliances, or restorations to treat temporomandibular joint dysfunctions (e.g. adjustments/corrections to the facial bones), congenital or developmental situations (including supernumerary teeth) or medically induced dental disorders, including but not limited to: myofunctional treatment (e.g. speech therapy), or myoskeletal dysfunctions, unless otherwise covered as an orthodontic benefit.
6. Services for cosmetic purposes or for conditions that are a result of hereditary developmental defects, such as cleft palate, upper and lower jaw malformations, congenitally missing teeth and teeth that are discolored or lacking enamel.
7. Procedures which are determined not to be dentally necessary consistent with professionally recognized standards of dental practice.
8. Procedures performed on natural teeth solely to increase vertical dimension or restore occlusion.
9. Any service performed outside of your assigned dental office, unless expressly authorized by LIBERTY Dental Plan, or unless as outlined and covered in the "Emergency Dental Care" section of the Evidence of Coverage.
10. The removal of asymptomatic, unerupted third molars (or other teeth) that appear to have an unimpeded pathway to eruption and no active pathology.
11. Procedures or appliances that are provided by a dentist who specializes in prosthodontic services.
12. Services for restoring tooth structure lost from wear (abrasion, erosion, attrition or abfraction), for rebuilding occlusion or maintaining chewing surfaces or teeth that are out of alignment or for stabilizing teeth. Examples of such treatment are equilibration and periodontal splinting.
13. Any routine dental services performed by a dentist or dental specialist in an inpatient/outpatient hospital setting.
14. Consultations for non-covered services.

**LIBERTY Dental Plan of California, Inc.**  
**LS300 Orthodontic Rider**

- Primary Dentition: Teeth developed and erupted first in order of time.
- Transitional Dentition: The Final phase of the transition from primary to adult teeth, in which the deciduous molars and canines are in the process of shedding and the permanent successors are emerging.
- Adolescent Dentition: The dentition that is present after the normal loss of primary teeth and prior to cessation of growth that would affect orthodontic treatment.
- Adult Dentition: The dentition that is present after the cessation of growth that would affect orthodontic treatment.

**Treatment must be provided by a LIBERTY Dental Plan contracted orthodontic provider.**  
**Any procedure not listed is available at the provider's usual and customary fee**
