Reminder: Medically accepted indication edit

As a reminder, Humana has a point-of sale edit that limits the clinical misuse of medications frequently used for health conditions where no evidence supports the safe and effective treatment of those conditions. The medications impacted by this edit are:

- Ozempic® (semaglutide)
- Rybelsus® (semaglutide)
- Trulicity® (dulaglutide)
- Victoza® (liraglutide)
- Mounjaro® (tirzepatide)
- Adlyxin® (lixisenatide)
- Bydureon® (exenatide)
- Byetta® (exenatide)
- Stromectol® (ivermectin)

Claims for the medication will deny with one of the error codes below:

Reject code	DUR free text message	DUR additional text message
39	ICD-10 is required	Please submit an ICD-10* code on the claim. **OR** The ICD-10 code \<insert ICD-10 code provided on the claim\> does not exist. Please submit a recognized ICD-10 code on the claim.
88	Use is not medically accepted	DRUG NOT SUPPORTED IN \<INSERT ICD-10 CODE PROVIDED ON THE CLAIM\> **AND/OR** PROVIDE EVIDENCE OF HIGH RISK OF SEVERE DISEASE

* ICD-10: International Classification of Diseases, 10th Revision

Claims will display the message "Soft Reject Payer Allows DUR/PPS Code Override" in the National Council for Prescription Drug Programs field if drug utilization review/professional pharmacy service (DUR/PPS) code functionality is allowed for a medication. Following consultation with the patient and/or provider and a review of pharmacy data, a pharmacist may override the rejection via entry of the below "Reason for Service," "Professional Service" and "Result of Service" codes for successful claim adjudication.

Edit description	Reason for Service code	Professional Service code	Result of Service code
Reject code: 39 Description: M/I diagnosis code This occurs when no ICD-10 code is present on a pharmacy claim because either the field is empty or a syntax invalid code is present.	MS: Missing information/clarification	M0: Prescriber consulted PH: Patient medication history R0: Pharmacist consulted other source	1B: Filled prescription as is 1G: Filled with prescriber approval
Reject code: 88 Description: Medically accepted indication required. This occurs when the ICD-10 code provided does not represent a medically accepted indication for the use of the medication or if the patient's age does not satisfy the high-risk requirement of a medically accepted indication.	DM: Apparent drug misuse	M0: Prescriber consulted PH: Patient medication history R0: Pharmacist consulted other source	1B: Filled prescription as is 1G: Filled with prescriber approval

The edits may be suppressed if Humana medical claims data supports the presence of a medically accepted indication for the medication or if an ICD-10 code for a medically accepted indication for the medication is submitted on the pharmacy claim. Otherwise, a prior authorization will be required. The patient's prescriber can submit a request for a prior authorization by calling Humana's Clinical Pharmacy Review department at **800-555-2546**. In Puerto Rico, the prescriber can call **866-488-5991**.

Humana's Bank Identification Number (BIN) and Processor Control Number (PCN) combinations are the following:

Line of business	BIN	PCN
Non-Medicare	610649	03190000
Medicare PDP and MAPD, IL Dual Demonstration	015581	03200000
Medicare Advantage (MA-only)	610649	03200004
Humana Healthy Horizons® in Florida	610649	03190000
Humana Healthy Horizons® in South Carolina	610649	03191504
