

Your Humana Group Medicare Advantage plan covers therapeutic continuous glucose monitors and supplies under Part B of your plan at \$0 copay

Do you use a continuous glucose monitoring system?

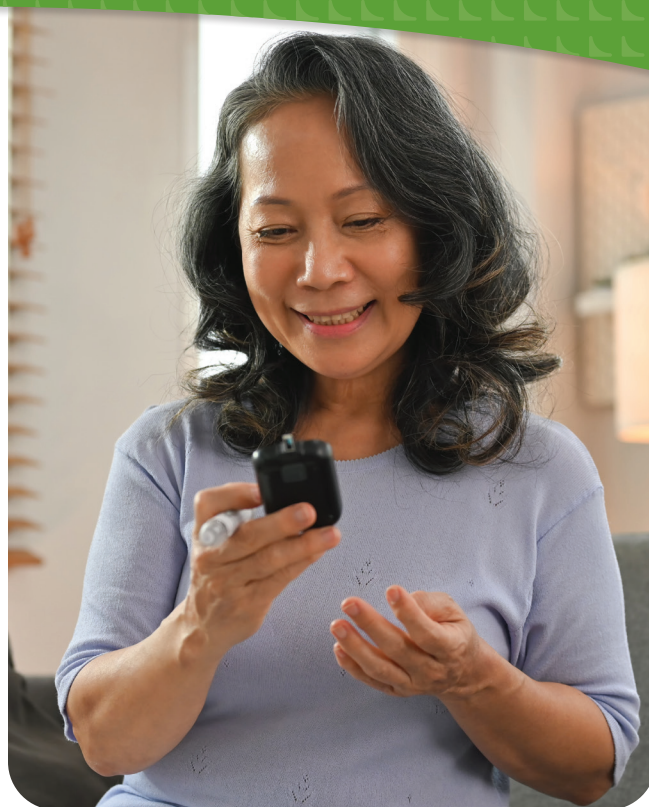

Medicare-covered therapeutic continuous glucose monitors (CGMs) and related supplies, including Dexcom and FreeStyle Libre, are covered under your Humana Group Medicare Part B medical benefit. These items may be obtained through a Medicare-approved durable medical equipment (DME) provider that accepts Medicare assignment and bills your insurance, through a participating retail pharmacy, or CenterWell Pharmacy®*.

If you are utilizing a CGM, please contact a DME provider, participating retail pharmacy, or CenterWell Pharmacy as soon as you receive your Humana member ID card for assistance obtaining your device and supplies.

How do I obtain a continuous glucose monitor?

CGMs are available through participating network retail pharmacies. In addition, CGMs and insulin pumps are available through our preferred DME vendors. For groups with mail order benefits, CGMs are covered at \$0 member cost share at CenterWell Pharmacy. CGMs require prior authorization approval across all three channels, regardless of provider.

*For groups with mail order benefits.
