

Pregnancy and heart health

Pregnancy comes with a lot of emotions. You might feel excited and nervous. But staying prepared during pregnancy can help ease your concerns. Your heart health is a great place to start, and that includes learning about preeclampsia.

Preeclampsia, or high blood pressure, is common and manageable during pregnancy. But left untreated, it can lead to serious issues. Here's what you need to know:

What raises your risk of preeclampsia?

- Being over age 40
- A first-time pregnancy
- Preeclampsia in past pregnancies
- Carrying multiple babies
- In vitro fertilization
- Family history of preeclampsia
- Type 1 or type 2 diabetes
- Obesity, lupus or thrombophilia

What are the signs of preeclampsia?

- Swelling of hands and feet
- Sudden weight gain
- Persistent headaches
- Difficulty breathing
- Pain on the right side below ribs
- Reduced urination
- Nausea and vomiting
- Lightheadedness and vision changes

How can you accurately test your blood pressure?

- Avoid exercise for 30 minutes before testing
- Do not smoke or consume caffeine before the reading
- Empty your bladder
- Uncover your arm for the cuff
- Rest at least 5 minutes before the reading
- Sit with your feet on the floor
- Avoid talking during the reading
- Support your arm at heart level

How can you protect your heart during pregnancy?

- Adopt a heart-healthy diet
- Exercise regularly
- Attend all your prenatal checkups
