

Provider education series

Educational opportunity	Topic(s)	CME's	Total time	Overview
Autism Case Training (ACT) – CDC →	Identify ASD, assist families with diagnostic process care for patients with ASD	1.75 AMA PRA category 1 credits	Self-paced	Free web-based introductory course designed to improve early identification of children with ASD and ensure timely and appropriate care. Three modules can be completed together or separately, and each module contains two or three case studies based on real-life situations. Each module is eligible for CME. To qualify, you must fill out an evaluation and take a quiz at the end of each module. Learn more about continuing education →
Autism Spectrum Disorders: Research and Medical Treatment Implications – Cleveland Clinic and Autism Research Institute →	Metabolic comorbidities, neurological comorbidities, gastrointestinal comorbidities, sleep issues, compassionate care	6 AMA PRA category 1 credits	30-45 minutes per section part	This activity provides expert insight about behavioral improvement that can be achieved when underlying comorbid medical and neurological issues associated with ASD are addressed. Health of children and adults with autism should be improved by virtue of educating about medical and neurological etiologies associated with this complex disorder.
Watch Me! Celebrating Milestones and Sharing Concerns – CDC →	Developmental monitoring, easily monitor, developmental milestones, educate parent about child development		60 minutes	Free online training course provides information on best practices for monitoring the development of children in your care and talking about it with their parents. An one hour, 4-module course focuses on why monitoring children's development is important.

The signs and symptoms in this table are intended to alert people to the possibility of ASD. Please keep in mind that everyone is different. And some people may show symptoms although they do not have ASD.
