

Know before you go:

Estimate your dental costs

Try our dental cost estimator tool on MyHumana

State of Texas Dental Choice PlanSM PPO participants can use Humana's dental cost estimator tool to:

- estimate the cost of common dental procedures based on price ranges in your area; and
- compare costs between in-network and out-of-network dentists.

Participants will save more using an in-network dental provider. Contact the dental provider directly to find out more about their pricing.

Start using the dental cost estimator:

1. Sign in to MyHumana at ERSdentalplans.com.
2. Select the "**Coverage**" tab and then "**Plan Benefits**."
3. Go to the bottom of the page and select "**Estimate costs for dental services**" in the "**Resources**" section.
4. Estimate your costs and contact Humana with any questions about your coverage.

Don't forget about your total annual maximum and other coverage details!

Contact Humana to help you prepare more for your planned dental visits.
