

Humana Healthy Horizons in Florida members eligible for well-child visits

A well-child visit is available to your Humana Healthy Horizons® in Florida-covered patients from birth through age 20. We're here to help you encourage Humana Healthy Horizons in Florida members to complete their routine health screenings to identify and correct medical conditions before they become more serious. As part of Florida's Early and Periodic Screening, Diagnosis and Treatment (EPSDT) program, a well-child visit is a good time to do so.

Making the most of the visit while the child is in the office

Some patients have a hard time getting to the doctor's office, so it's important to maximize each visit. There may be times when a well-child visit is appropriate even if the patient shows some mild symptoms of illness (e.g., runny nose/cold).

Components of a well-child visit

- Appropriate immunizations
- Comprehensive unclothed physical examination
- Dental screening, including dental referral, when required
- Developmental assessment
- Diagnosis and treatment
- Gathering of comprehensive health and developmental patient history, including assessment of past medical history, developmental history and behavioral health status
- Health education and anticipatory guidance
- Hearing screening, including objective testing, when required
- Laboratory test, including blood lead testing, when required
- Nutritional assessment
- Referral and follow-up, as appropriate
- Vision screening, including objective testing, when required

Humana Healthy Horizons in Florida is a Medicaid product of Humana Medical Plan Inc.

Importance of lead testing

Federal regulation requires all children to receive a blood test for lead at:

- 12 months old and 24 months old
- 36 months old and 72 months old for children who have not had a previous blood lead screening

How do well-child visit measures compare to the Healthcare Effectiveness Data and Information Set (HEDIS®) measures?

Components of the well-child visit and various HEDIS measures address annual wellness visits for children:

- Well-child visits in the first 30 months of life (W30)
- Child and adolescent well-care visits (WCV)
- Adults' access to preventive/ambulatory health services (AAP)
- Lead screening in children (LSC)

The main difference between the well-child visit measures and related HEDIS measures is based on the child's continuous enrollment in the plan, as well as the measurement periods for both groups of measures. With well-child visit measures, children are placed in the health plan's denominator (children meeting criteria for the service) once the child has been enrolled for at least 90 days. The measurement period is Oct. 1 through Sept. 30. HEDIS measures typically place children in the health plan's denominator once the child has been with the plan for 12 months. The timeline for many HEDIS measures is Jan. 1 through Dec. 31.

Most procedure codes detailed below cover both well-child visit and HEDIS measures, depending on care rendered to the member.

Members on the HEDIS and Child Health Check-Up (CHCUP) visits action lists you receive monthly and quarterly, respectively, may overlap based on the criteria detailed above about continuous enrollment and measurement periods. In addition, compliance also may be met with one visit based on the well-child visit time frames listed below.

The Humana Healthy Horizons in Florida approach to improve well-child visit measures

Humana Healthy Horizon in Florida is works to improve well-child visit measures using a variety of methods, including:

- Nurses who work directly with physician practices to promote well-child visits and improve HEDIS scores
- Outreach to patients using printed materials, online information and phone calls
- Patient reward programs through which eligible Medicaid members can earn rewards for receiving certain immunizations, screenings and wellness visits

Billing tips

To ensure you receive credit for performing well-child visit requirements, please use the correct codes when submitting encounters and claims.

Well-child visit age or description	Well-child visit ICD-10 codes	New patient CPT codes	Established patient CPT codes
Neonatal exam	NA	99460	NA
Two to four days for newborns discharged 48 hours of less post delivery	NA	99461 99463	
By 1 month	NA	99381	99391
2 months	NA		
4 months	NA		
6 months	NA		
9 months	NA		
12 months	NA	99382	99392
15 months	NA		
18 months	NA		
2 years to under 5 years	NA		
5 years to under 12 years	NA	99383	99393
12 years to under 18 years	NA	99384	99394
18 years to under 21 years	NA	99385 EP	99395 EP
Encounter for health supervision and care of other health infant & child	Z76.2	99202 – 99205	99213 – 99215
Encounter for routine child health exam with abnormal findings	Z00.121		
Encounter for routine child health exam without abnormal findings	Z00.129		
Health exam for newborn under 8 days old and	Z00.110		
Health exam for newborn under 8 to 28 days old and/or	Z00.111		
Encounter for general adult medical exam without/with abnormal findings and/or	Z00.00-01		
Encounter for exam for admission to educational institution	Z02.0

Encounter for exam for recruitment to armed forces	Z02.3		
Encounter for exam for driving license	Z02.4		
Encounter for exam for participation in sport	Z02.5		

Well-child visit age or description	Well-child visit ICD-10 codes	New patient CPT codes	Established patient CPT codes
Encounter for insurance purposes	Z02.6		
Encounter for paternity testing	Z02.81		
Encounter for adoption services	Z02.82		
Encounter for blood-alcohol and blood-drug test	Z02.83		
Encounter for other administration exam	Z02.89		
Encounter for other general exam	Z00.8		
Encounter for exam for normal comparison and control in clinical research program	Z00.6		
Encounter for exam of potential donor of organ and tissue	Z00.5		
Encounter for exam for period of delayed growth in childhood without abnormal findings	Z00.70		
Encounter for exam for period of delayed growth in childhood with abnormal findings	Z00.71		

Notes: The child may enter the periodic schedule at any time. For example, if a child has an initial screening at age 4, then the next periodic screening should be performed at age 5. This information may be found at **Periodicity Schedule 2021.indd (aap.org)** →

Referral codes

According to the Agency for Health Care Administration (AHCA) Handbook's Evaluation and Management Services Coverage Policy, physicians and other health care professionals must include the following well-child visit referral codes, as appropriate, on the claim form:

- AV – Available-not used (recipient refused referral)
- NU – Not used (no EPSDT recipient referral given)
- S2 – Under treatment (recipient currently under treatment for referred diagnostic or corrective health problem)
- ST – New service requested (recipient referred to another provider for diagnostic or corrective treatment or scheduled for another appointment with screening provider for diagnostic or corrective treatment for at least one health problem identified during an initial or periodic screening service, not including dental referrals)

For more information, please refer to: **Well Child Visit (myflorida.com)** →
